

Killian Louis Grant

Principal / Staff Software Engineer

Denver, CO • +1 (720) 231-9248 • killian@killiangrant.com • linkedin.com/in/killianlgrant • github.com/nailliK

Seasoned full-stack software engineer with 15+ years designing, evolving, and owning complex product systems in high-stakes and regulated domains. Shipped production LLM systems that cut manual effort 88%, scaled ETL pipelines to 36K records/minute, and architected multi-tenant platforms serving healthcare, commerce, and enterprise clients. Works end-to-end from product intent through implementation; shapes APIs, data models, workflows, and frontend surfaces to ensure systems remain correct, maintainable, and resilient under real-world constraints. Brings a bias toward durability, operational clarity, and reducing cognitive load in products that must hold up over time.

Experience

DrWell

Senior Software Engineering Manager | Dec 2024 – Jan 2026

- Designed and built the core backend for a multi-tenant healthcare product platform focused on medication ordering, fulfillment, and compliance
- Implemented role-based access control and audit logging to support safe access across practices and meet regulatory requirements
- Built dosage validation and prescribing checks to catch errors early and reduce manual review in high-risk workflows
- Created configuration-driven rules for pricing, inventory, permissions, and shipping to avoid hard-coding tenant-specific logic
- Defined and evolved shared platform foundations including access control, auditability, and configuration-driven workflows
- Worked closely with product to turn evolving requirements into clear technical designs; called out risks and edge cases before implementation
- Mentored engineers into full platform ownership through architectural guidance and day-to-day technical decision-making

TheKey

Senior Technical Director | Dec 2023 – Oct 2024

- Built and integrated LLM-based systems to summarize caregiver shift notes and flag safety or quality-of-care issues
- Built LLM-driven quality-of-care sentiment and categorization workflow to flag unsafe content for manager review; reduced review time from 8 hours to 1 hour per week (88%)
- Added automated tone and structure checks to shift notes shown in the family app; making updates easier to read and more consistent
- Increased engagement from 2,500 to 3,000 monthly users over three months by improving clarity and presentation of family-facing notes
- Scaled ETL pipelines from 12K to 36K records/minute over six months
- Worked across backend services and product features to support integrations with third-party healthcare tools and internal systems

Codelab303

Senior Technical Lead | Mar 2023 – Sep 2023

- Rebuilt wine subscription product for national restaurant chain; replaced brittle WooCommerce setup with flexible system for subscriptions, payments, and account management; increased subscriptions 25% over nine months
- Improved the purchase flow and subscription logic, contributing to a sustained increase in completed subscriptions after launch
- Migrated team from WordPress to headless CMS using reusable content modules and GraphQL queries; increased productivity 11%

- Built Kotlin Multiplatform health and fitness app for pregnancy tracking with provider data sharing; research trials showed 50% decrease in pregnancy-related complications
- Worked across the product to balance rapid delivery with maintainability as requirements evolved

Kin+Carta

Principal Architect | Dec 2021 – Mar 2023

- Built bulk purchasing and distribution platform that replaced a fully manual sales process; allowed customers to place large, multi-location orders directly instead of coordinating by phone over several hours
- Designed workflows to support sell-to/ship-to distribution; enabled distributors to manage complex ordering, packaging, and delivery scenarios in a single system
- Reduced purchasing time from hours to minutes by moving sales-rep-mediated ordering into a self-service product experience
- Built ML-backed product recommendation feature for a large home goods brand; increased engagement 15% and recommendation-based purchases 11%
- Worked with cross-functional teams and external platform partners to integrate custom product features with existing enterprise systems
- Improved delivery speed and reduced release friction through deployment automation workflows; increased operational efficiency 5%
- Enterprise clients: Corteva, Crate & Barrel

InteliVideo

Senior Front-End Technical Lead | Jul 2020 – Dec 2021

- Led front-end modernization of video-on-demand streaming platform for the health and wellness industry
- Re-architected subscriber experience to improve usability and enable faster iteration on member-facing features
- Established front-end standards and review practices to improve code quality and reduce regressions
- Provided technical leadership through planning support, implementation guidance, and unblock/ship ownership across the team

Techtonic

Director, Apprenticeship Instruction and Development | Jan 2020 – Jul 2020

- Rebuilt apprenticeship curriculum to align training outcomes with real client delivery expectations
- Designed and implemented new course tracks and materials to close gaps between bootcamp fundamentals and production work
- Established evaluation and feedback loops for apprentices to improve readiness, ownership, and delivery confidence
- Guided program through COVID disruption; adapted structure and delivery while maintaining quality standards
- Enterprise clients: Angie's List

Fruition

Director of Engineering | Jul 2018 – Jan 2020

- Architected ML-driven customer engagement platform for healthcare; increased return visits 30% through journey tracking and tailored messaging
- Built reusable front-end framework that accelerated delivery of content and marketing sites
- Led multidisciplinary delivery teams; improved execution through clearer scoping, streamlined QA, and tighter cross-functional handoffs
- Improved estimation accuracy 25% through revised scoping models; increased revenue 8% with risk modifier
- Coached leads and senior engineers on planning, standards, and delivery practices to increase ownership and reduce rework
- Enterprise clients: Kaneka, Dependable Cleaners

Monigle

Technical Director | Jul 2017 – Sep 2018

- Modernized legacy DAM platform to multi-tenant SaaS; improved uptime from frequent downtime to 99%
- Reduced client customization effort 85% via reusable modules and theming engine
- Built CMS workflow shifting content changes from engineering releases to client-managed updates

- Led engineering, QA, and ops for platform modernization effort; owned delivery plans, technical direction, and release readiness
- Established engineering standards and operating practices that improved consistency and reduced production issues
- Enterprise clients: Deloitte, Kodak, Re/Max, CBRE

Spire Digital

Director of Engineering | Oct 2013 – Jun 2017

- Scaled engineering org from 5 to 50; built hiring, onboarding, and development pathways for leads and managers
- Partnered with product leadership to implement Lean/Agile delivery system; improved ownership, visibility, and predictability across teams
- Implemented Lean delivery; reduced defects 60%, improved cycle times 50%
- Set and enforced engineering standards and best practices to improve quality, maintainability, and delivery consistency
- Built cross-functional operating rhythms that improved collaboration between engineering, QA, ops, and product
- Enterprise clients: Denver International Airport, Everything For Offices, SRS Acquiom

Skills

Hard

TypeScript, JavaScript, Node.js, NestJS, React, Next.js, Vue.js, Svelte, SvelteKit, Rust, Java, Spring Boot, PHP, Laravel, SQL, PostgreSQL, MySQL, BigQuery, MongoDB, Redis, GraphQL, REST APIs, RESTful Architecture, Distributed Systems, Microservices, Multi-tenant SaaS, RBAC, Authentication Systems, Event-driven Architecture, Integration Architecture, Containerization, Docker, CI/CD, AWS, GCP, Front-End Web Development, Back-End Web Development, Full-Stack Development, SaaS Development, E-Commerce, Scalability, LLM Integration, RAG Pipelines, Summarization, Sentiment Analysis, Classification Workflows, Agentic Workflows, Generative AI, Machine Learning, Natural Language Processing (NLP), Prompt Engineering, ETL, Data Engineering, Adobe Experience Manager (AEM), Jira, Logging and Observability, Secure Code Review

Soft

Engineering Management, People Management, Performance Management, Team Scaling, Team Building, Org Design, Hiring, Interviewing, Onboarding, Training and Development, Mentorship, Coaching, Cross-functional Leadership, Cross-functional Collaboration, Technical Leadership, Organizational Leadership, Stakeholder Management, Stakeholder Engagement, Client Expectations Management, Executive-level Communication, Influencing Without Authority, Psychological Safety, Conflict Resolution, Delivery Planning, Technical Delivery Management, Software Process Management, Release Management, Estimation, Project Estimation, Prioritization, Scope Management, Resource Management, Capacity Planning, Risk Management, Risk Assessment, Agile, Agile Methodologies, Scrum, Lean, Continuous Process Improvement, Technology Roadmapping, Technology Management, Key Performance Indicators (KPIs), Objectives and Key Results (OKRs), Architecture Reviews, Code Review, Technical Decision-making, Vendor Management, Software Development Life Cycle (SDLC), Solution Architecture, Change Management

Education

Red Rocks Community College | Associate of Arts, Visual Communications
